

Micro Diamond Straps

 DiamArt® | ARKIMEDIA

Micro Diamond Straps for the watch-making industry

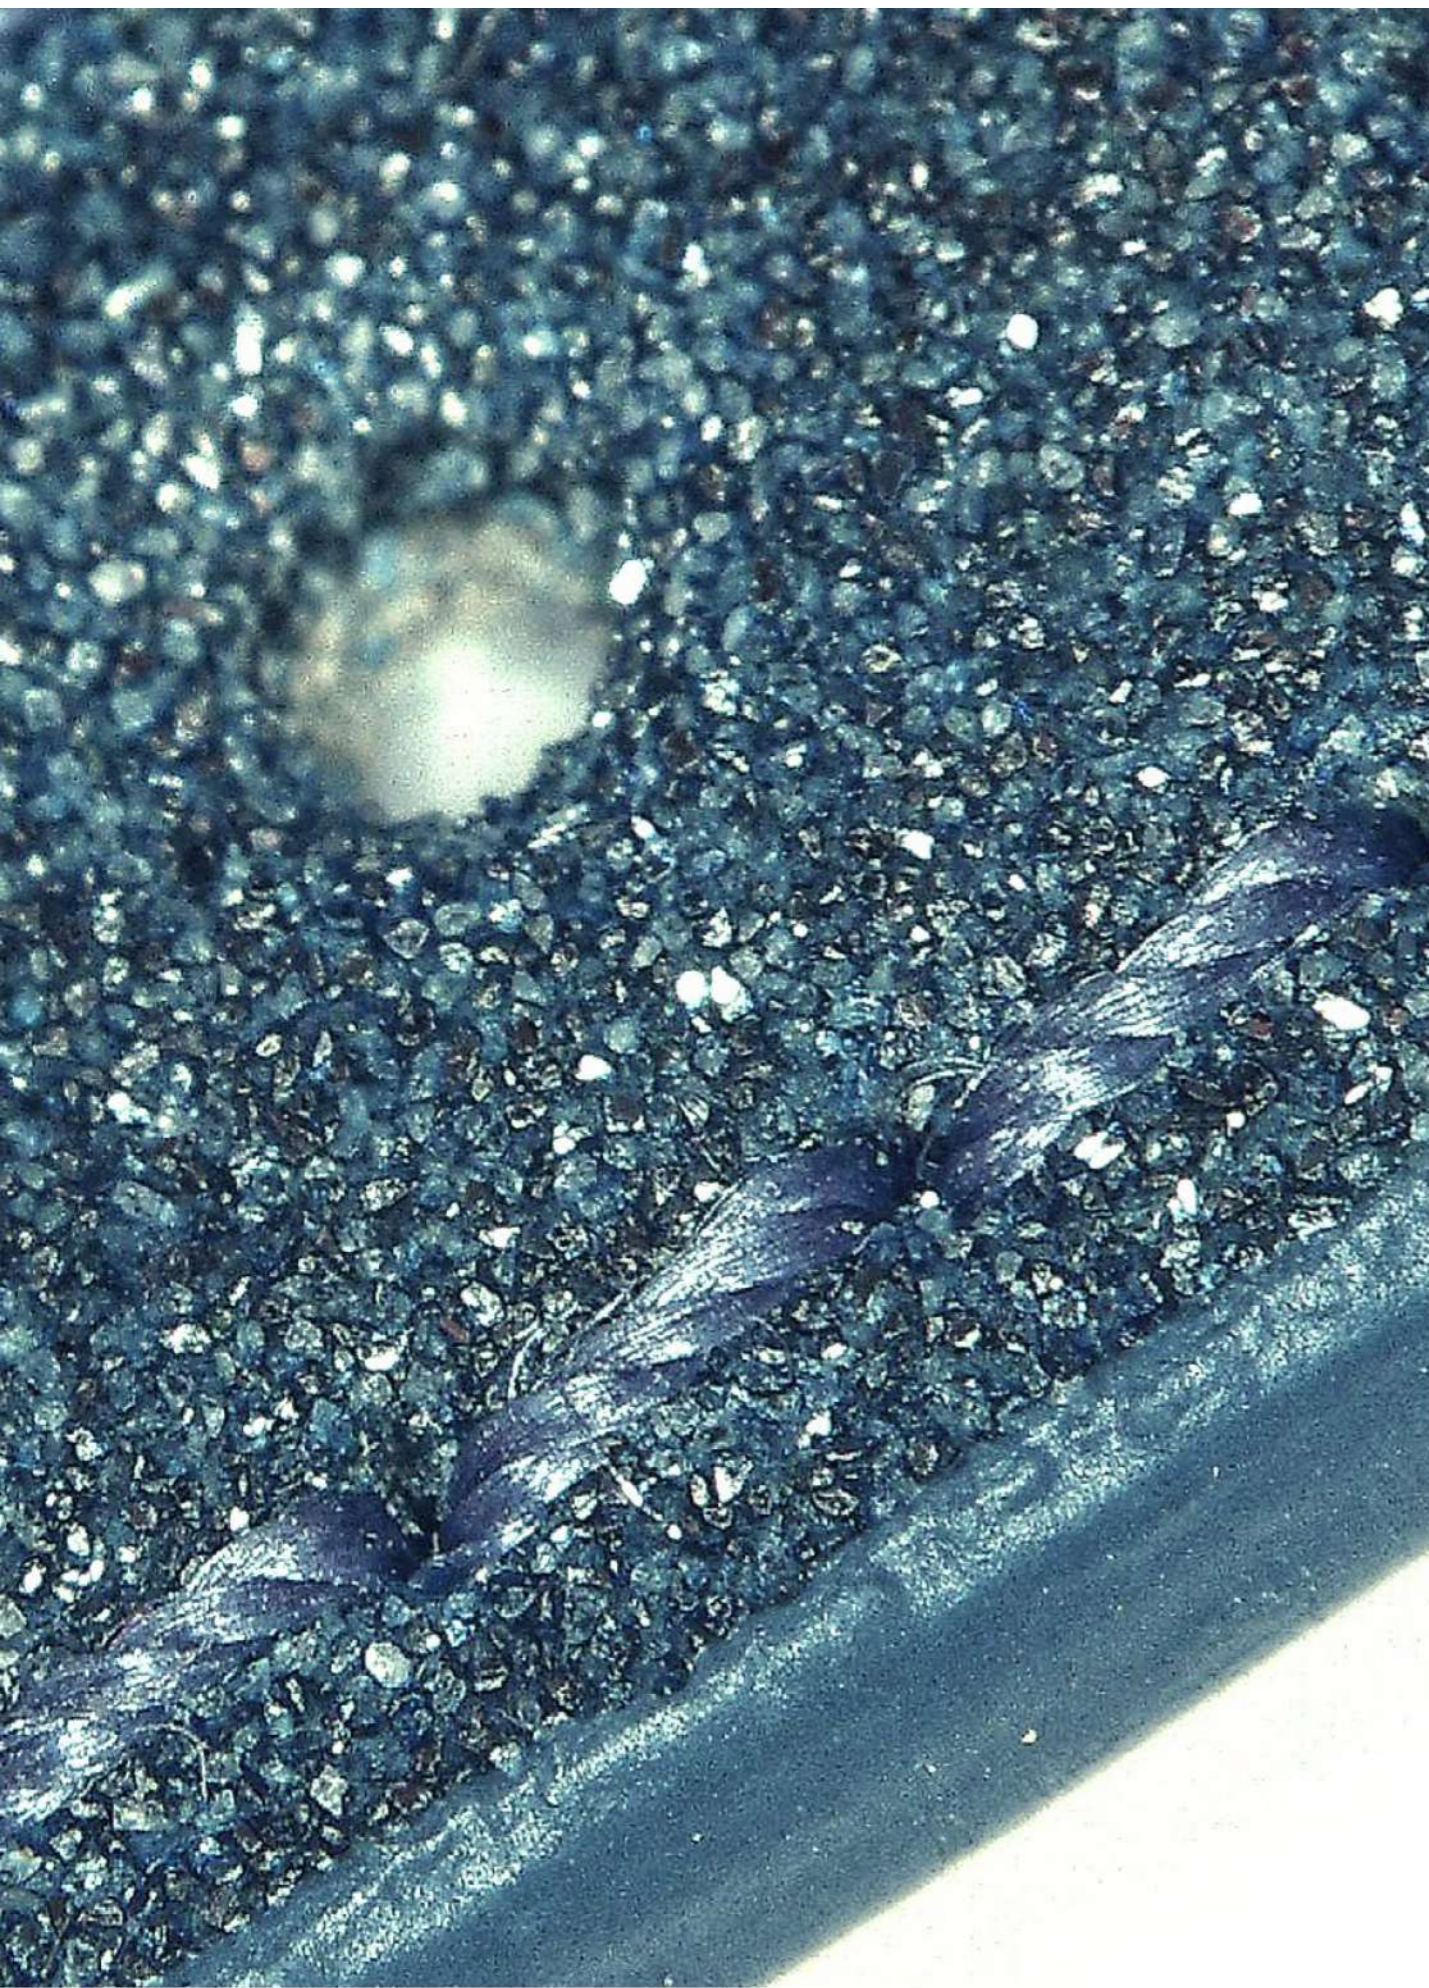

DiamArt accepted the challenge to bring its Diamond Surface to flexible shapes.

Thanks to DiamArt unique technology, combined with the 30 years experience of Arkimedia in the production of leather straps, a straps entirely made of micro diamonds has born. A world first.

The union of preciousness and innovation to reach a new form of luxury creativity.

Diamonds made flexible

A game-changer Application for Watch-making

Diamonds are usually related to concepts like hardness and rigidity. Why don't we change that?

When Technology met Craftmanship something extraordinary can happen.

Now diamonds are a new material for watch-making straps.

Technology and Craftmanship

Made in Italy with Responsibility

DiamArt has made a selection of the diamond suppliers to match the highest ethical and quality standards. The DiamArt Micro Diamond Surfaces are made by a patented technological processes (Ref. EP283737506B1, WO2017212396) where the carats calculation method respects the standards of the Italian Gemological Institute.

Exclusivity and Certification

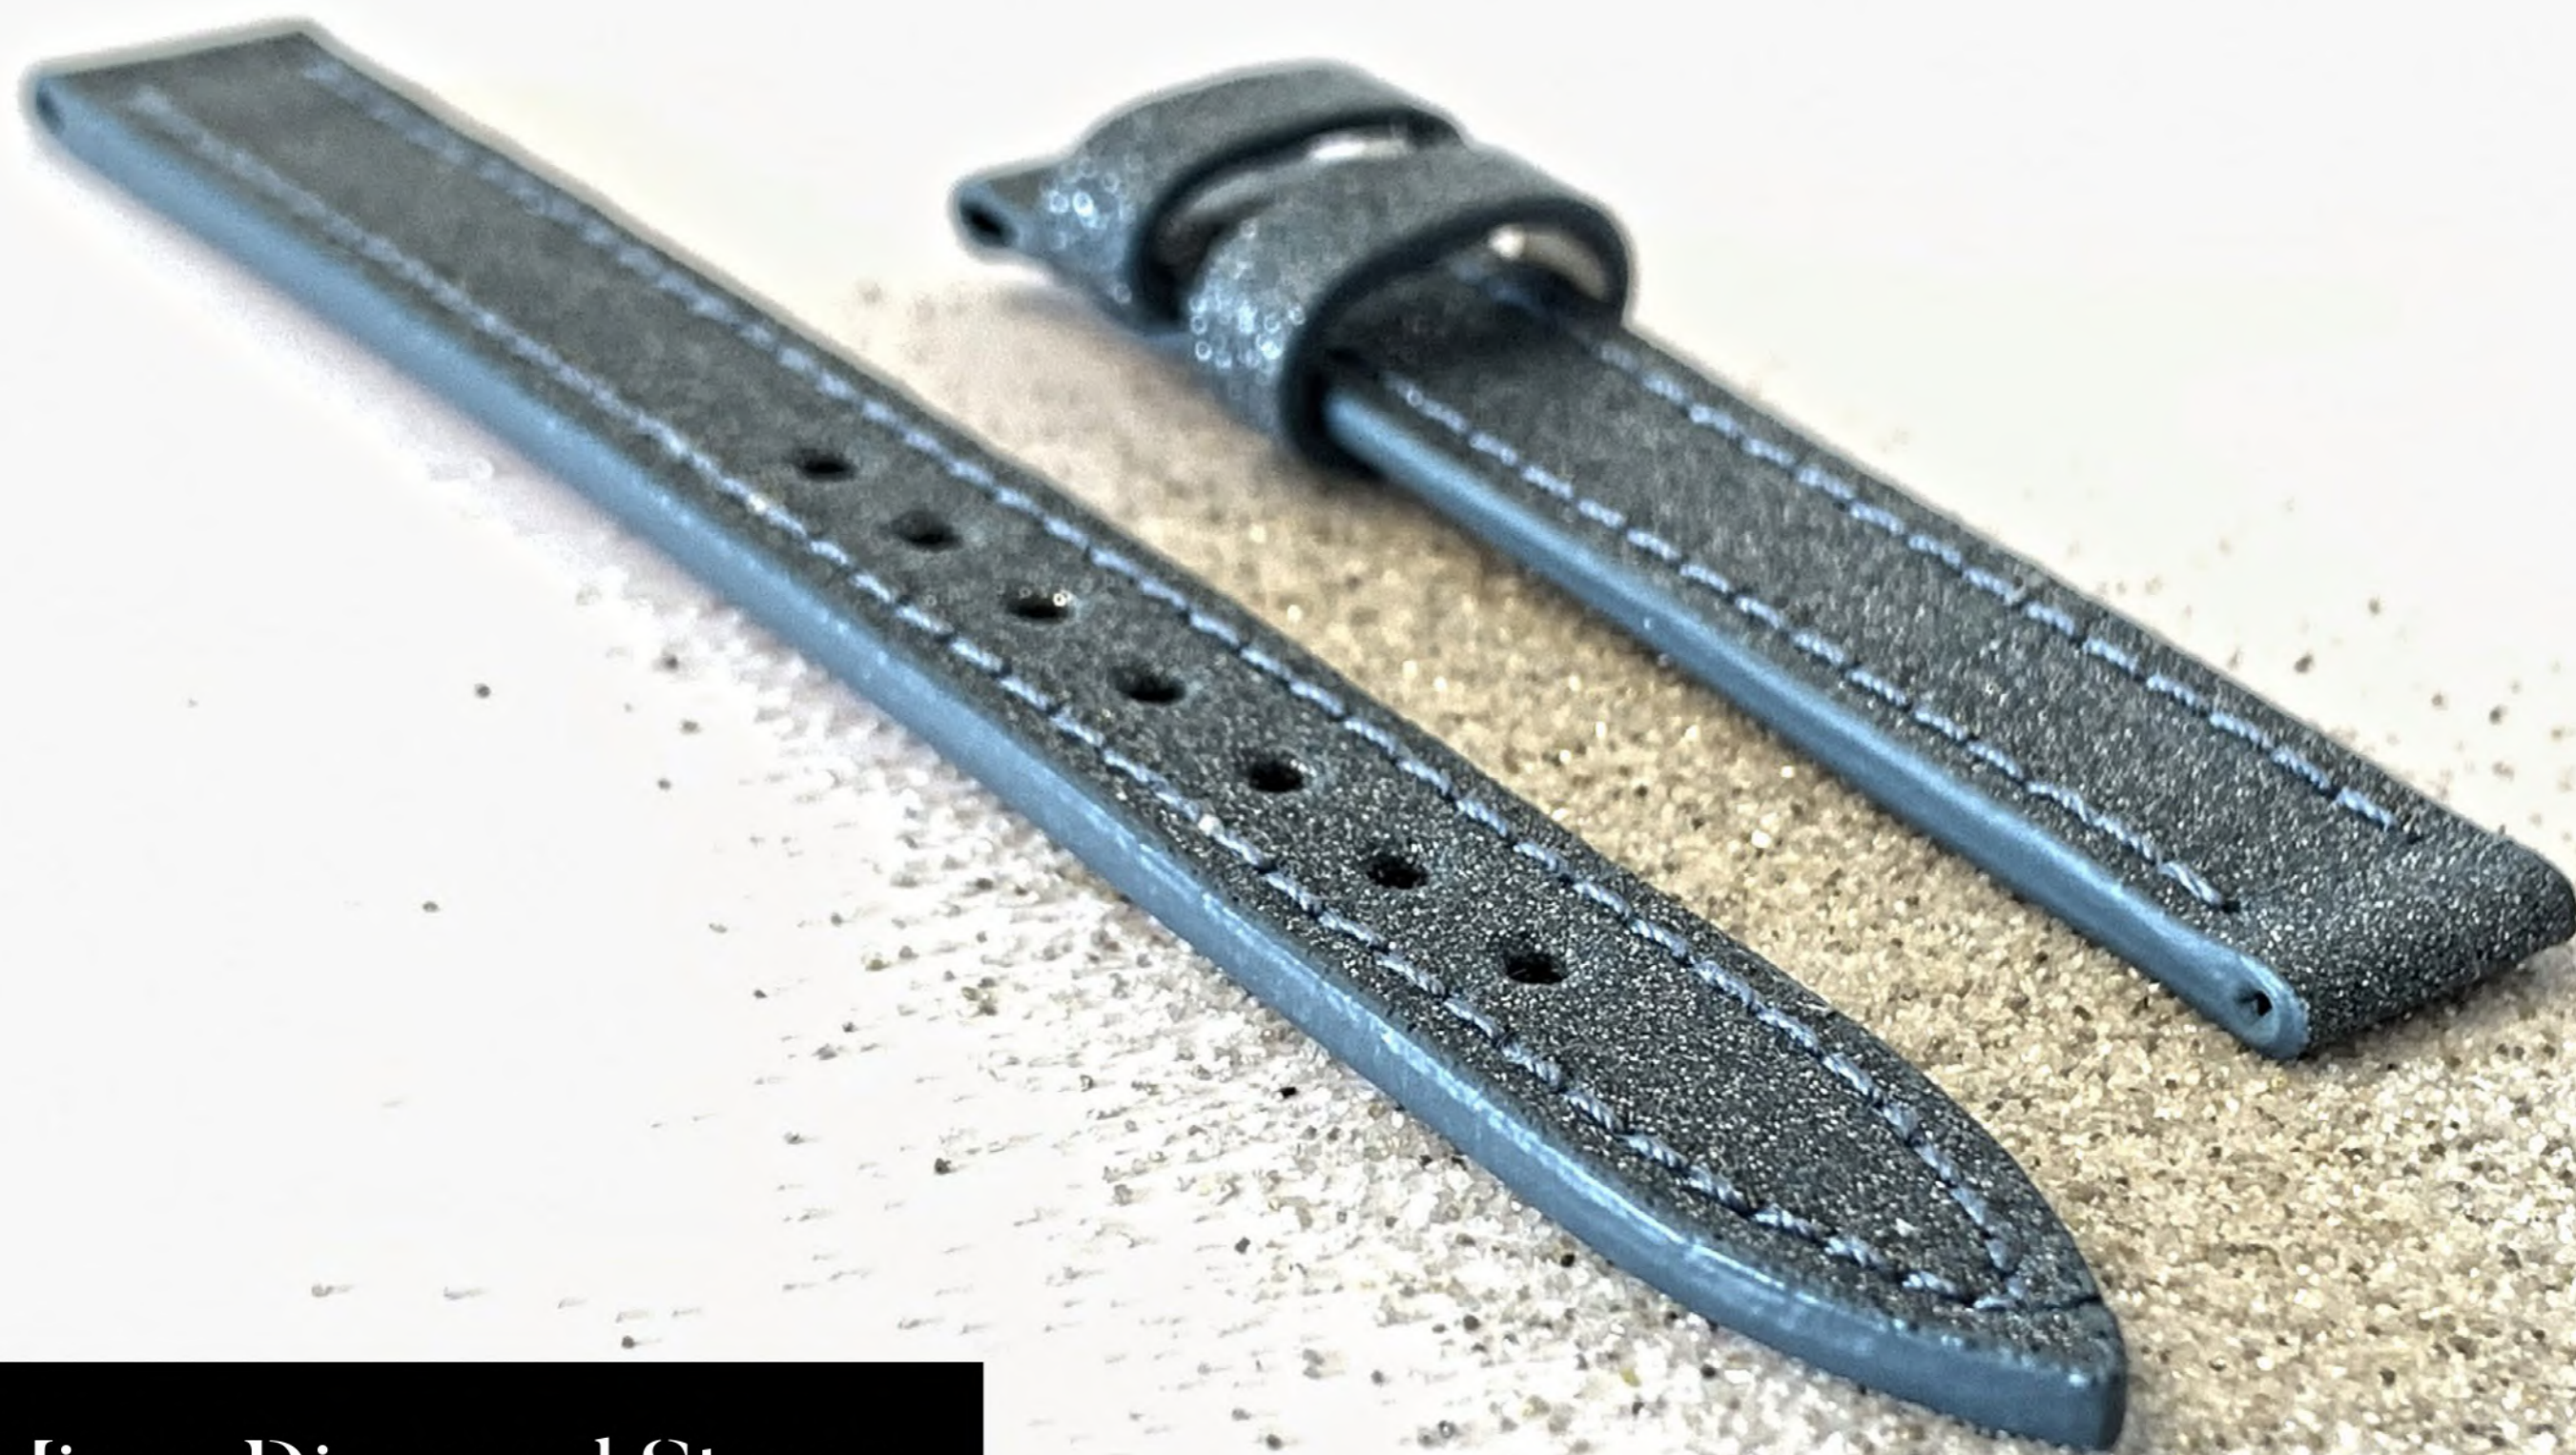

Design your Diamond Straps through Colors and Shapes

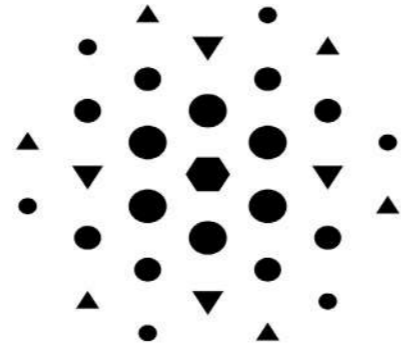

Your project can be completely customize to match your desires.

Micro Diamond Surfaces comes in various colours and every straps design is developed based on the client drawing.

Infinite Customizations
